Spend less.
Live better.

PIXII HOME

The solar battery that pays for itself!

Get more out of your solar energy. Cut your electricity bill with smart energy savings, and generate income by supporting your local grid.

Energy independence is now within reach – with clean, green energy.

MAXIMIZE YOUR ENERGY SAVINGS

Solar self-consumption

Store energy from the sun to power your home with free, clean, renewable electricity when you need it.

Arbitrage*

Store energy from the grid when it's cheap to use when electricity cost is high.

Peak Shaving

Cut service fees to your grid supplier by shaving off the peaks of your energy consumption.

**Features like Arbitrage will soon be available directly through our app in 2025. In the meantime, this functionality is accessible via third-party EMS integration.*

GENERATE INCOME

Sell grid support services

Get paid* for renting out battery capacity to help support your local grid, through ancillary services like FCR, FFR and FCAS.

Sell your surplus energy

Make money** by selling your excess solar energy back to the grid.

***Local regulations may vary - certain countries and regions impose restrictions that could impact the usage of your energy storage system.*

Durable Nordic design

Built for harsh weather conditions.

Pixii Home combines the simplicity and elegance of Nordic design and the toughness of Viking endurance.

It is designed for outdoor installation with an industrial-strength metal casing and is backed up by a 10-year warranty for enduring reliability.

SMART ENERGY STORAGE

Start small and grow as you go!

Begin with 10kW/10kWh and expand up to 20kW/20kWh as your energy demands or family grows.

Regular software updates ensure that your Pixii Home remains compatible with your grid. You can add more batteries as your energy need increases so that you can charge into the future with confidence!

Pixii Home is modular, making it easy to add more batteries as your energy need changes.

Power at your fingertips!

Take control with the easy-to-use Pixii Home app.

Instant overview of your energy consumption

Reveal how much comes from your solar panels versus the grid. Embrace a smarter, energy independent lifestyle.

Performance at a glance

The app provides detailed monitoring of your battery's performance and health, ensuring optimal functionality and long life.

Watch your savings grow

The Pixii Home app estimates your energy savings, translating your efficient energy management into tangible financial benefits.

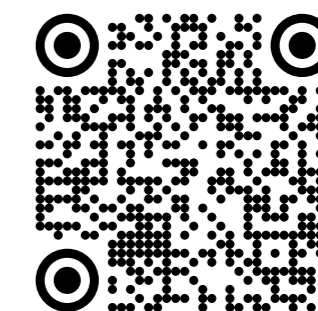

For installers

Collaborate with us to stay relevant and grow your business.

This is your opportunity to grow your business with a product that combines ease of installation, customer satisfaction, and growth potential, boosted by green incentives. Engineered in Norway, Pixii Home sets a new standard in energy storage with its robust design and GDPR compliance. Its future-proof nature, supported by software updates, offers adaptability in smart energy management. Benefit from our comprehensive training and support and engage in our partnership program for new customer leads.
